

# The 1st China-Overseas Pesticide/Biopesticide Business Matchmaking Event

Wednesday 15th - Friday 17th November, 2017

Nanjing, China

Organized by:  AgroPages.com

# Why Attend the Business Matchmaking Event?

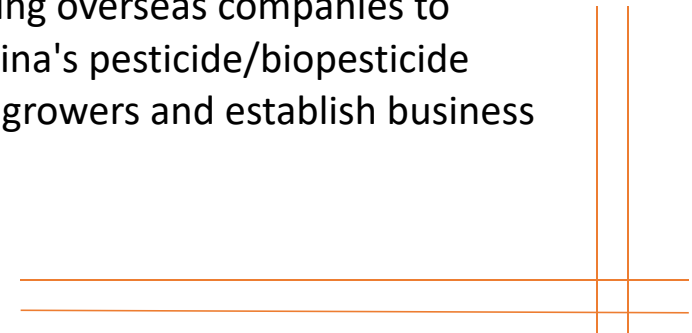

*“The zero growth Plan of pesticide consumption published by Chinese government will create more business opportunities for highly efficient, low toxic, and environmental friendly...”*

**AgroPages**

**China** is the world's largest consumer of pesticides. But years of high production volume and overuse of chemical pesticides have contaminated its farmlands. Therefore, the country has announced in 2015 that it's targeting zero growth in the use of chemical pesticides and fertilizers by 2020.

**Increasing** number of overseas companies have entered into Chinese market and made some achievements over a decade. The release of the zero growth of pesticide consumption will provide more development opportunities to the overseas companies.

**Matchmaking** event aims at helping overseas companies to better understand the situation of China's pesticide/biopesticide market, the requirements of Chinese growers and establish business connection with Chinese distributors.
